

Stopping Validity of Product

Dear Student Friend,

The validity of our product starts from the date of **activation done by you**.

And **not** from the date of **purchase** done by you.

However, once it is activated, the system calculates the expiry date **automatically**.

We don't have any control over it. It is technically not possible to stop the validity.

Moreover nobody in this world can stop time from ticking away.

Now you have the following two choices :

(1) View the lectures before the expiry of its validity period

OR

(2) Renew the product key from our website at a nominal price, **anytime after** the expiry date. It is **not** necessary to renew it immediately after the expiry. You can do it anytime but only **after** the expiry and not before.
